DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The "image comprises a removing agent" is indefinite. The image on a silicone oil receptor as in the discussion of the background reads on applicants' claim 1 and the removing agent, which also called a release agent note page 24 and 30 and has a lipophilic and hydrophilic group.

Claim Rejections - 35 USC § 103

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mochizuki et al [6913860] in view of Uchiyama et al [5863697]. Mochizuki et al teaches a method for removing images in which the toner has a release agent note Col. 10 lines 45-66 and uses heat to remove the image. Toners having hydrophilic low temperature softening substance are taught in Uchiyama et al. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the toners having a release agent such as a low temperature wax in the

method of heating an image to the release temperature of the image to reduce the image binding force.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 29-33 of U.S. Patent No. 6,913,860 in view of Uchiyama et al. Release agents are known as taught in Uchiyama et al and the stripping of an image having a binding force-reducing substance by heating the image would be obvious to one of ordinary skill in the art.

6. The requirement for restriction is repeated and made final. The inventions are drawn to independent and distinct inventions since they use different materials in different process steps. Reconsideration will be made upon a determination of allowable subject matter.
